

SMART-LOC STANDING SEAM

Residential & Commercial Roof Panel

METAL ROOFING

is safe, strong and energy-efficient.

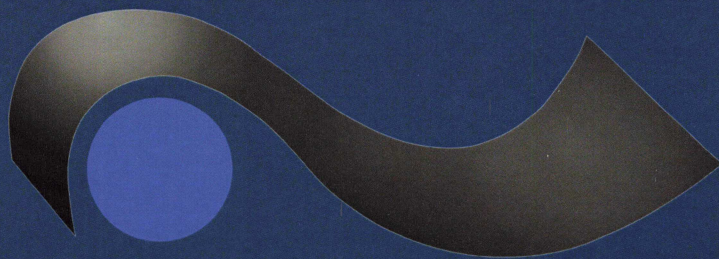

SMART-LOC PANEL

The quality metal roofing choice for a smooth, clean, fastener-free appearance. This hidden-fastener (standing seam) system, conceals the structure of the panel under the vertical seams. With the fasteners attached in a slotted screw strip, the metal expands and contracts without compromising the screw attachments.

Minimal maintenance and up-keep required — a great fit for any commercial or residential project .

THE QUALITY CHOICE...
